

Powerful 2x2 MIMO airMAX™ BaseStation

Models: RM2-Ti, RM5-Ti

Rugged Weatherproof Die-Cast Aluminum Enclosure

High Throughput Gigabit Ethernet Port

Incredible 50+ km Range and 150+ Mbps Speed

# **Overview**

### Powerful airMAX<sup>™</sup> BaseStation Platform

Building upon our market-leading Rocket™ series, the Rocket™M Titanium features enhanced radio perfomance and superior durability. Thoughtfully engineered with Gigabit Ethernet, RocketM Titanium models achieve massive throughput increase along with unleashed speed. Its Carrier-Class capabilities link distances up to 50+ km and provide breakthrough speed of up to 150+ Mbps real TCPI/IP throughput.

The RocketM Titanium enclosure was specifically designed to improve performance in harsh RF environments and in extreme weather conditions. Enclosed in aircraft-grade aluminum, the RocketM Titanium is a rugged, high-power, linear 2x2 MIMO radio.

Rocket devices may be deployed in PtP bridging or PtMP airMAX BaseStation applications. They can be paired with your choice of airMAX BaseStation™ Sector or RocketDish™ antennas. This versatility gives network architects unparalleled flexibility and convenience.

### airMAX Technology

Unlike standard WiFi protocol, Ubiquiti's Time Division Multiple Access (TDMA) airMAX protocol allows each client to send and receive data using pre-designated time slots scheduled by an intelligent AP controller. This "time slot" method eliminates hidden node collisions and maximizes airtime efficiency. It significantly improves performance in throughput, reduces latency, and increases scalability compared to all other outdoor systems in its class.

**Intelligent QoS** Priority is given to voice or video for seamless streaming.

**Scalability** High capacity and scalability.

**Long Distance** Capable of high-speed links up to 50+ km.

**Latency** Multiple features dramatically reduce noise.

## **GPS Synchronization\***

RocketM5 Titanium units have integrated Ubiquiti airSync<sup>™</sup> technology. airSync enhances the hardware and software of the Rocket to utilize GPS signals for precision timing.

**GPS Signal Reporting** airOS<sup>™</sup> was upgraded to take full advantage of the new GPS hardware in Rocket GPS units. Easily manage and monitor GPS satellite signals.

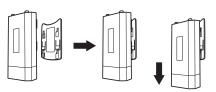

### **No Co-Location Interference**

Synchronized transmission among Rocket GPS powered BaseStations effectively eliminates co-location interference.

**External GPS Antenna** The RocketM5 Titanium includes a weatherproof external GPS antenna.

## **Easy Installation**

The RocketM Titanium and airMAX BaseStation/RocketDish antennas have been designed to seamlessly work together.

Installing the RocketM Titanium on an airMAX BaseStation or RocketDish antenna requires no special tools. You simply snap it securely into place with the universal Rocket mount built into the antennas

<sup>\*</sup> GPS features only available on RocketM5 Titanium

# Models

### **RocketM2 Titanium**

# **RocketM5 Titanium**

# **Software**

# air OS

airOS is a versatile, highly developed Ubiquiti firmware technology. It is exceptionally intuitive and was designed to require no training to operate. Behind the user interface is a powerful firmware architecture that enables high-performance, outdoor multipoint networking.

- Protocol Support
- Channel Shifting
- Spectral Width Adjustment
- ACK Auto-Timing
- AAP Technology
- Multiple VLAN Support
- DHCP Relay
- Multi-Language Support

# air View

Integrated on all Ubiquiti M products, airView provides advanced spectrum analyzer functionality: waterfall, waveform, and real-time spectral views allow operators to identify noise signatures and plan their networks to minimize noise interference.

**Waterfall** Aggregate energy over time for each frequency.

**Waveform** Aggregate energy collected.

**Real-time** Energy is shown in real-time as a function of frequency.

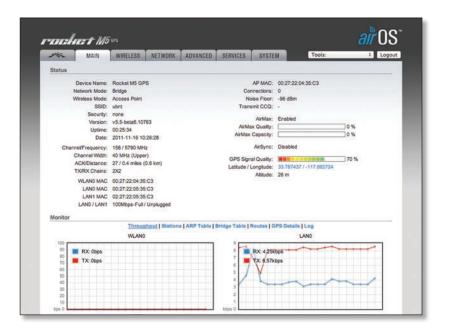

**Recording** Automate airView to record and report results.

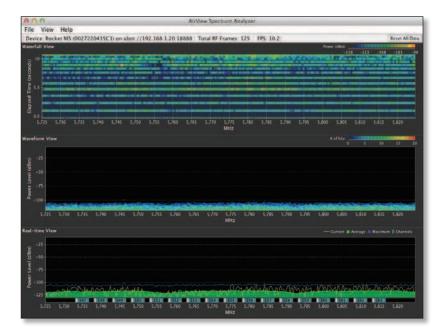

# air Control

airControl is a powerful and intuitive Web-based server network management application that allows operators to centrally manage entire networks of Ubiquiti devices.

- Network Map
- Monitor Device Status
- Mass Firmware Upgrade
- Web UI Access
- Manage Groups of Devices
- Task Scheduling

# **Specifications**

System Information					
Processor Specs	Atheros MIPS 24KC, 400 MHz				
Memory Information	64 MB SDRAM, 8 MB Flash				
Networking Interface	(1) 10/100/1000 Ethernet Port (1) 10/100 Ethernet Port				
RF Connections					
RM2-Ti	2 RP-SMA (Waterproof)				
RM5-Ti	2 RP-SMA (Waterproof), 1 SMA (GPS)				

Regulatory / Compliance Information					
Wireless Approvals	FCC Part 15.247, IC RS210, CE				
RoHS Compliance	Yes				

Physical / Electrical / Environmental				
Dimensions	160 x 80 x 44 mm			
Weight	350 g			
Enclosure Characteristics	Die Cast Aluminum			
Max. Power Consumption				
RM2-Ti	6.5 Watts			
RM5-Ti	8.0 Watts			
Power Supply	48V, 0.5A PoE Adapter (Included)			
Power Method	Passive Power over Ethernet (pairs 4, 5+; 7, 8 return)			
ESD/EMP Protection	30KV Contact / Air for Ethernet			
Operating Temperature	-30 to 75° C			
Operating Humidity	5 to 95% Condensing			
Shock and Vibration	ETSI300-019-1.4			

Software Information				
Modes Station, Station WDS, Access Point, Access Point WDS, AP Repe				
Services	SNMP, DHCP, NAT			
Utilities	Site Survey with Preferred SSID, Antenna Alignment Tool, Discovery Utility			
Security	WEP/WPA/WPA2			
QoS	802.11e / WMM Support			
Statistical Reporting	Ethernet Activity, Uptime, Packet Success/Errors			

LED Indicators					
System LEDs	Power, WAN, LAN, GPS (RM5-Ti only)				
Antenna Align / Signal Strength LEDs	Software Adjustable to Correspond to Custom RSSI Levels

# **TOUGH**Cable

**OUTDOOR CARRIER CLASS SHIELDED** 

Protect your networks from the most brutal environments with Ubiquiti's industrial-grade shielded Ethernet cable, TOUGHCable™.

#### **Increase Performance**

Dramatically improve your Ethernet link states, speeds, and overall performance with Ubiquiti TOUGHCables.

### **Extreme Weatherproof**

TOUGHCables have been built to perform even in the harshest weather and environments.

### **ESD Damage Protection**

Protect your networks from devastating electrostatic discharge (ESD) attacks.

### **Extended Cable Support**

TOUGHCables have been developed to increase power handling performance for extended cable run lengths.

### **Bulletproof your networks**

TOUGHCable is currently available in two versions: Level 1 Shielding Protection and Level 2 Shielding Protection.

**Level 1** is a Category 5e outdoor carrier-class shielded cable with an integrated electrostatic drain wire.

**Level 2** is a Category 5e outdoor carrier-class shielded cable that features an Anti-Crosstalk Divider and additional shielding. It is rated to provide optimal performance on Gigabit Ethernet networks.

#### **Additional Information:**

- 24 AWG copper conductor pairs
- 26 AWG integrated ESD drain wire to prevent ESD attacks & damage
- PE outdoor-rated weatherproof jacket
- Multi-layered shielding
- Available in 1000 ft (304.8 m) length

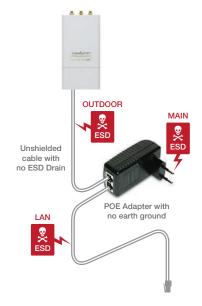

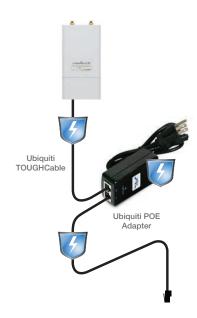

### **TOUGHCable Connectors**

Specifically designed for use with Ubiquiti TOUGHCables and available in 100 pc. bags, TOUGHCable Connectors protect against ESD attacks and Ethernet hardware damage while allowing rapid field deployment without soldering.

ESD attacks are overwhelmingly the leading cause for device failures. The diagram below illustrates the areas vulnerable to ESD attacks in a defenseless network.

By using a grounded Ubiquiti Power over Ethernet (PoE) adapter along with Ubiquiti TOUGHCable and TOUGHCable Connectors, you can effectively protect against ESD attacks.

TERMS OF USE: The Ubiquiti radio device must be professionally installed. Shielded Ethernet cable and earth grounding must be used as conditions of product warranty. It is the installer's responsibility to follow local country regulations including operation within legal frequency channels, output power, and Dynamic Frequency Selection (DFS) requirements.
